

KABA®

Charon half-height turnstiles
and swing doors

Stylish access control

«The inauguration of our new head office was a great success. The entrance hall is spacious, transparent and open. Rather than clashing, the access control units blend in perfectly with the interior design»

Charon half-height turnstiles manage access control efficiently at high-profile entrances, in VIP rooms or at access points to executive suites and complement their surroundings at the same time.

An all-stainless steel version without glass elements is suitable for outdoor installations.

Throughput rate	=	up to 25 persons per minute
Security level	=	● ● ○ ○ ○
Staff supervision	=	yes

Why Charon turnstiles?

2

- stylish, transparent design
- units made of stainless steel and glass
- range of design options for glass swing doors, guiding elements and bar handles
- easy passage thanks to power-assisted drive

We recommend matching Charon automatic swing doors to provide access to people with reduced mobility.

Fields of application

- Office and administrative buildings
- Ministries
- Government buildings
- Airports
- Banks and financial institutions

A smart solution for any entrance
